

Name: Morgan Hodge

My CW2 submission fulfills are conditions to pass:

Software compiles	Yes
Populated Git repo consistent with DLE submission exists	Git link: https://github.com/Mdot5596/Optimised-Developer-Tool
At least 1 shader from Lecture 5-10 implemented on CW1 model/scene	List all CW2 features here and bold the one claimed: 1) Bloom Effect 2) Particle Fountian 3) Gaussian Blur
Write up and video explanation submitted	Filenames: readme.md Youtube: https://www.youtube.com/watch?v=wCH8nPTUi_Y
By submitting this form, I acknowledge the following submission is entirely my own work	Yes

My CW2 project has the following features

Feature	Description	Category	Marks	Checklist (Cross the ones that are NA)
Particle Fountian	Implementation of advanced particle fountian in particles.vert/particle.frag, and Scenebasic uniform cpp. Green acid particles erupt from the can. Details are mentioned in my report and video. Verified for pass	CW2 Rubrics	0	GIT Video Report
Gaussian Blur	Implementation of Gaussian Blur in blur.vert/blur.frag, and Scenebasic uniform cpp. The characters vision is blurry. Details are mentioned in my report and video. Verified. Not sure why you claim it isn't working in the video? It is in the rendered scene.	CW2 Rubrics	10	GIT Video Report
Bloom	Attempted Bloom as seen in bloom.frag and bloom.vert, unfortunately It was not able to fully function in scene I'll give some marks for the attempt.	CW2 Rubrics	5	GIT Video Report
Feature Marks (Basic and Advanced)		20	15	
Passing Marks		40	40	
Research and Gamification		30	0	
Aesthetics		10	8	
There are more content and context to the scene now. The fountain and blur is a good display of technological prowess. Good job.				
Minimum marks expected		100	63
